Hi Nancy,
We have to purge the cache every time we change the page.

Here is the latest version on our server:

http://origin-www2.epa.gov/sites/production/files/signpost/cc.html

this will start to show up at

https://www.epa.gov/sites/production/files/signpost/cc.html

and then once you all publish the news release, we will update it again and purge the cache again.

Thanks

Subject: Request for time-sensitive website assistance

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you
Climate Change: [www.epa.gov/climatechange](http://www.epa.gov/climatechange)

Overview site containing: climate basics, FAQs, glossary, newsroom, what EPA is doing, what you can do, regulatory initiatives, voluntary climate programs, international climate programs, economic analyses, EPA Adaptation Collaboration, Endangerment materials and links to other climate microsites.

Related Microsites:

**Climate Change Science:** [www.epa.gov/climate-change-science](http://www.epa.gov/climate-change-science)

Climate science overview, causes of climate change, future of climate change, extreme weather. Links to other microsites.

**Climate Change Impacts:** [www.epa.gov/climate-impacts](http://www.epa.gov/climate-impacts)

Impacts by sector and region, climate and health resources.

**Climate and Energy Resources for State, Local, and Tribal Governments:** [www.epa.gov/statelocalclimate](http://www.epa.gov/statelocalclimate)

**Students’ Guide to Global Climate Change:** [www.epa.gov/climatechange/kids](http://www.epa.gov/climatechange/kids)

**Clean Power Plan** ([www.epa.gov/cleanpowerplan](http://www.epa.gov/cleanpowerplan))
Looks great .. thanks

It's now live at https://www.epa.gov/newsreleases/epa-kicks-website-updates . I added a link in the body of the third para to the Energy Indep site. LMK if you would like tweaks/changes.

Subject: Request for time-sensitive website assistance

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Climate Change: www.epa.gov/climatechange

Overview site containing: climate basics, FAQs, glossary, newsroom, what EPA is doing, what you can do, regulatory initiatives, voluntary climate programs, international climate programs, economic analyses, EPA Adaptation Collaboration, Endangerment materials and links to other climate microsites.

The redirects are in and we believe they are all working.

Pages are being purged from Akamai, although it may take up to 30 more minutes for them all to clear.

They clear fast but one by one.

Hi Nancy,
We have to purge the cache every time we change the page.

Here is the latest version on our server:

http://origin-www2.epa.gov/sites/production/files/signpost/cc.html
this will start to show up at

https://www.epa.gov/sites/production/files/signpost/cc.html

and then once you all publish the news release, we will update it again and purge the cache again.

Thanks

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.
We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

**Climate Change:** [www.epa.gov/climatechange](http://www.epa.gov/climatechange)

Overview site containing: climate basics, FAQs, glossary, newsroom, what EPA is doing, what you can do, regulatory initiatives, voluntary climate programs, international climate programs, economic analyses, EPA Adaptation Collaboration, Endangerment materials and links to other climate microsites.

**Related Microsites:**

**Climate Change Science:** [www.epa.gov/climate-change-science](http://www.epa.gov/climate-change-science)

Climate science overview, causes of climate change, future of climate change, extreme weather. Links to other microsites.

**Climate Change Impacts:** [www.epa.gov/climate-impacts](http://www.epa.gov/climate-impacts)

Impacts by sector and region, climate and health resources.
Climate and Energy Resources for State, Local, and Tribal Governments: www.epa.gov/statelocalclimate

Clean Power Plan (www.epa.gov/cleanpowerplan)
Hi Nancy,
We have to purge the cache every time we change the page.

Here is the latest version on our server:

http://origin-www2.epa.gov/sites/production/files/signpost/cc.html

this will start to show up at

https://www.epa.gov/sites/production/files/signpost/cc.html

and then once you all publish the news release, we will update it again and purge the cache again.

Thanks

Danny,

We can make the Energy Independence homepage a “Best Bet” and thus the first result for
Clean Power Plan for our EPA Search engine if you request it.

We are no longer indexing the old clean power plan website or CPP tool box and have not been since Sunday.

Now if there is other random content related to CPP that is still live on EPA.GOV then yes it can
and will come back in our EPA search results.

Subject: RE: Request for time-sensitive website assistance

Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC
2. Re start apache webservers one at a time
3. Test some important CC related URLs

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to https://www.epa.gov/sites/production/files/signpost/cc.html

Ex. 5 - Deliberative Process

Leopard, Matthew <Leopard.Matthew@epa.gov>
Cc: Grantham, Nancy <Grantham.Nancy@epa.gov>
Subject: Request for time-sensitive website assistance

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.
Thank you

**Climate Change:** [www.epa.gov/climatechange](http://www.epa.gov/climatechange)

Overview site containing: climate basics, FAQs, glossary, newsroom, what EPA is doing, what you can do, regulatory initiatives, voluntary climate programs, international climate programs, economic analyses, EPA Adaptation Collaboration, Endangerment materials and links to other climate microsites.

**Related Microsites:**

**Climate Change Science:** [www.epa.gov/climate-change-science](http://www.epa.gov/climate-change-science)

Climate science overview, causes of climate change, future of climate change, extreme weather. Links to other microsites.

**Climate Change Impacts:** [www.epa.gov/climate-impacts](http://www.epa.gov/climate-impacts)

Impacts by sector and region, climate and health resources.

**Climate and Energy Resources for State, Local, and Tribal Governments:**
[www.epa.gov/statelocalclimate](http://www.epa.gov/statelocalclimate)

**Students’ Guide to Global Climate Change:** [www.epa.gov/climatechange/kids](http://www.epa.gov/climatechange/kids)

**Clean Power Plan** ([www.epa.gov/cleanpowerplan](http://www.epa.gov/cleanpowerplan))
Danny,

We can make the Energy Independence homepage a “Best Bet” and thus the first result for Clean Power Plan for our EPA Search engine if you request it.

We are no longer indexing the old clean power plan website or CPP tool box and have not been since Sunday.

Now if there is other random content related to CPP that is still live on EPA.GOV then yes it can and will come back in our EPA search results.

Thanks

Tomorrow morning, I will archive clean-power-plan. Tomorrow during the day, you'll want to rename the ARCHIVED clean-power-plan back to cleanpowerplan using your Perl script.

~Mike

Subject: RE: Danny said you can archive Clean Power Plan. How do we keep it from getting into our own search results?

No that is not what I mean. In order to successfully run the archive process from the webcmsg, the “wget” command needs to work and get to the content, and not get redirect to energy independence. So Mike has to rename the real site, long enough for the archive process to get carried out.
How can we keep [www.epa.gov/clean-power-plan](http://www.epa.gov/clean-power-plan) from getting into search results when Mike renames the existing [www.epa.gov/cleanpowerplan](http://www.epa.gov/cleanpowerplan) website.

**Subject:** Re: Danny said you can archive Clean Power Plan. How do we keep it from getting into our own search results?

Do you mean keep the temporary archive directory from getting into our search results? [www.epa.gov/cleanpowerplan](http://www.epa.gov/cleanpowerplan) is long gone from our search results, and archive is categorically excluded from default search results. I'm assuming that there are no restrictions on what you can find in archive if you do an explicit archive search, right?

As far as archiving, you will move the content to something like [archive.epa.gov/epa/clean-power-plan](http://archive.epa.gov/epa/clean-power-plan) and I will update the links and move it to [archive.epa.gov/epa/cleanpowerplan](http://archive.epa.gov/epa/cleanpowerplan)?
I am tied up from 3:30 until 7:00pm but I can easily have this done this evening before indexing runs. If for any reason I cannot complete it, I will make sure the temporary directory is not indexed. But thanks for the consideration on the timing.

I would do this archiving early in the morning and go as fast as I can. Wouldn’t that prevent the indexing?

The URL pattern would be "clean-power-plan" if that helps (changed from "cleanpowerplan").

~Mike

He understands that you will need to temporarily rename it with an obscure  
appendage or something to make it not caught by the redirect.

He also understands that it will appear on the Web Topics Published list for a  
bit.

I told him it would not appear in our EPA search results, so Peter what do you  
need to do to not feed yourself the (new) web area when Mike renames it?

Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC
2. Re start apache webservers one at a time
3. Test some important CC related URLs

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to https://www.epa.gov/sites/production/files/signpost/cc.html

Hi there –

Ex. 5 - Deliberative Process
Do we have a sense of timing?

Thanks much

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.
Please let us know if you have questions.

Thank you

**Climate Change:** [www.epa.gov/climatechange](http://www.epa.gov/climatechange)

Overview site containing: climate basics, FAQs, glossary, newsroom, what EPA is doing, what you can do, regulatory initiatives, voluntary climate programs, international climate programs, economic analyses, EPA Adaptation Collaboration, Endangerment materials and links to other climate microsites.

**Related Microsites:**

**Climate Change Science:** [www.epa.gov/climate-change-science](http://www.epa.gov/climate-change-science)

Climate science overview, causes of climate change, future of climate change, extreme weather. Links to other microsites.

**Climate Change Impacts:** [www.epa.gov/climate-impacts](http://www.epa.gov/climate-impacts)

Impacts by sector and region, climate and health resources.

Subject: RE: Danny said you can archive Clean Power Plan. How do we keep it from getting into our own search results?

No that is not what I mean. In order to successfully run the archive process from the webcams, the “wget” command needs to work and get to the content, and not get redirect to energy independence. So Mike has to rename the real site, long enough for the archive process to get carried out.

How can we keep www.epa.gov/clean-power-plan

from getting into search results when Mike renames the existing www.epa.gov/cleanpowerplan website.

Thanks

Subject: Re: Danny said you can archive Clean Power Plan. How do we keep it from getting into our own search results?

Do you mean keep the temporary archive directory from getting into our search results? www.epa.gov/cleanpowerplan is long gone from our search results, and archive is categorically excluded from default search results. I'm assuming that there are no restrictions on what you can find in archive if you do an explicit archive search, right?

As far as archiving, you will move the content to something like archive.epa.gov/epa/clean-power-plan and I will update the links and move it to archive.epa.gov/epa/cleanpowerplan?

I am tied up from 3:30 until 7:00pm but I can easily have this done this evening before indexing runs. If for any reason I cannot complete it, I will make sure the temporary directory is not indexed. But thanks for the consideration on the timing.

Subject: Re: Danny said you can archive Clean Power Plan. How do we keep it from getting into our own search results?

I would do this archiving early in the morning and go as fast as I can. Wouldn't that prevent the indexing?

The URL pattern would be "clean-power-plan" if that helps (changed from "cleanpowerplan").

~Mike

He understands that you will need to temporarily rename it with an obscure
appendage or something to make it not caught by the redirect.

He also understands that it will appear on the Web Topics Published list for a bit.

I told him it would not appear in our EPA search results, so Peter what do you need
to do to not feed yourself the (new) web area when Mike renames it?

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.
The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Clean Power Plan (www.epa.gov/cleanpowerplan)
Hi Lin,

Attached is the weekly report for your review.

Altowese
WCSD WEEKLY REPORT – Week of April 27-May 3, 2017

**WCSD Helps Update epa.gov to Reflect the Priorities of the New Administration** - On Friday April 28, members of the Web Content Services Division carried out the directions of Office of Public Affairs to redirect some EPA public websites to new locations. Working with contractor staff, OEI redirected [www.epa.gov/climatechange](http://www.epa.gov/climatechange) to a static page explaining “We are currently updating our website to reflect EPA’s priorities under the leadership of President Trump and Administrator Pruitt.” WCSD staff took other steps to clear the Climate Change website content quickly from the Akamai content delivery network so that OPA could issue their News Release referencing the new information. In addition, WCSD staff redirected the Clean Power Plan and Clean Power Plan Toolbox to the new Energy Independence site. WCSD staff also directed the EPA search team to remove some of affected URLs from EPA search results and fixed some issues with other redirects on www3.epa.gov. (Susan Fagan, 202-566-2021, Mike Hessling, Hessling.Michael@epa.gov, John Shirey, 919-541-5730)

**SharePoint Organization Site Request Workflow** - The process through which people request SharePoint sites has been updated. While work and community sites need only go to the Office/Region Site Collection Administrator (SCA) for approval and deployment, organization site requests need to go through a sponsor’s approval as well. This sponsor is often a manager -- someone who needs to know about organization-specific sites. The workflow for the organization site request goes to the sponsor before it goes to the SCA for final approval and deployment. (Sally Martiny, 202/564-6067)

All but the yellow goes in.

This page is being updated.

Thank you for your interest in this topic. We are currently updating our website to reflect EPA's priorities under the leadership of President Trump and Administrator Pruitt. If you're looking for an archived version of this page, you can find it on the January 19 snapshot (Link is: https://19january2017snapshot.epa.gov/climatechange_.html)

Here’s what our Public Affairs Office released about these changes (link to press release) that is being drafted. THIS TEXT WILL GO ONLINE AFTER THE RELEASE GOES LIVE

Can someone the exact corrections to the signpost page in one email?

We are not certain of our exact changes
Hi all – the link below has the old language to for the custom 404 page – Susan, you have the new language, right?

Also the energy independence page is live per Danny and Susan has the URL.

Ex. 5 - Deliberative Process

Will be right back in touch.

Thanks ng

Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC
2. Re start apache webservers one at a time
3. Test some important CC related URLs

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to https://www.epa.gov/sites/production/files/signpost/cc.html

Hi there –

So we have this now – just wondering how we should coordinate timing – as we need to send the press release once everything is done and then that link needs to go in the custom 404 notice.

Do we have a sense of timing?

Thanks much

I would do this archiving early in the morning and go as fast as I can. Wouldn't that prevent the indexing?

The URL pattern would be "clean-power-plan" if that helps (changed from "cleanpowerplan").

~Mike

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.
The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Subject: Danny said you can archive Clean Power Plan. How do we keep it from getting into our own search results?

He understands that you will need to temporarily rename it with an obscure appendage or something to make it not caught by the redirect.

He also understands that it will appear on the Web Topics Published list for a bit.

I told him it would not appear in our EPA search results, so Peter what do you need to do to not feed yourself the (new) web area when Mike renames it?

Thanks

Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC
2. Re start apache webservers one at a time
3. Test some important CC related URLs

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to  
https://www.epa.gov/sites/production/files/signpost/cc.html
Thanks

Hi Annie,

We (OEI) manage the internet infrastructure. Content is managed by the Program Offices under the leadership of the Office of Public Affairs in the Administrator’s Office. Let me know if that answers your question.

Subject: Website Management: Energy Independence?

Hi Lin,

Do we in OEI manage this Energy Independence web page: https://www.epa.gov/energy-independence?

As I understand, we do a lot of work on the framework/back end for many EPA web pages, but most of the www.epa.gov internet pages (including content) are maintained and managed by other program offices. Is that true? I ask because I’m trying to understand OEI’s role for the internet – and especially this particular page – better as EPA web pages are shifting around, causing more press inquiries into the agency.

Thanks,

Annie

Subject: RE: Weekly Report Draft WCSD web team implements Office of Public Affairs website changes

Draft:

**WCSD web team implements Office of Public Affairs website changes** - On Friday April 28, members of the Web Content Services Division carried out the directions of Office of Public Affairs to redirect some EPA public websites to new locations. Working with contractor staff, OEI redirected [www.epa.gov/climatechange](http://www.epa.gov/climatechange) to a static page explaining “We are currently updating our website to reflect EPA’s priorities under the leadership of President Trump and Administrator Pruitt. “ WCSD staff took other steps to clear the Climate Change website content quickly from the Akamai content delivery network so that OPA could issue their News Release referencing the new information. In addition, WCSD staff redirected the Clean Power Plan and Clean Power Plan Toolbox to the new Energy Independence site. WCSD staff also directed the EPA search team to remove some of affected URLs from EPA search results and fixed some issues with other redirects on www3.epa.gov.

Good morning,

Please submit your weekly report to me and Lin by noon, Tuesday, May 2, 2017.

Altwese
Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC
2. Re-start apache web servers one at a time
3. Test some important CC related URLs

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to https://www.epa.gov/sites/production/files/signpost/cc.html

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Climate Change: www.epa.gov/climatechange
Overview site containing: climate basics, FAQs, glossary, newsroom, what EPA is doing, what you can do, regulatory initiatives, voluntary climate programs, international climate programs, economic analyses, EPA Adaptation Collaboration, Endangerment materials and links to other climate microsites.

Ok. Awaiting a formal “go”
correct

I’m fairly certain we’ve got this correct but I want to verify:

/cleanpowerplan and /cleanpowerplantoollbox will redirect to /Energy-Independence

/ClimateChange will go to the custom 404
Hi Lin,

Do we in OEI manage this Energy Independence web page: https://www.epa.gov/energy-independence?

As I understand, we do a lot of work on the framework/back end for many EPA web pages, but most of the www.epa.gov internet pages (including content) are maintained and managed by other program offices. Is that true? I ask because I’m trying to understand OEI’s role for the internet – and especially this particular page – better as EPA web pages are shifting around, causing more press inquiries into the agency.

Thanks,

Annie

Hi Yvonne,

Can we add one more entry?

May Web Council Meeting Highlights

On Wednesday, May 10, the Web Council met to discuss updating websites, new features, and revised standards. JP Freire started the meeting off by explaining that the 2017 administration is busy reviewing EPA’s many websites. Blocks of web content have been moved offline to undergo review (press release). Next, Jessica Orquina went over the updated external link procedure. Linking to external sites that have requests for monetary donations or solicit memberships is not allowed. However, if EPA has a formal agreement in place such as a Memorandum of Understanding, then the external link may be posted. Next, Mike Hessling showed off the new LinkIt tool in Drupal, which enables you to quickly set up a link to
a page within a web area. Users can search for links by node number, within their own web areas, or pull up links across epa.gov. Next, Sylvette Games gave an update on OMB Memo 17-06, which details 15 requirements that agencies must follow for their public websites. www.epa.gov complied with all requirements, however some other domains and subdomains that come from EPA may not yet be in compliance with these requirements. Next, Angela Shogren briefed the group on the revised Web Standards and asked that everyone review the proposed revisions by May 26. The Web Council members will share these updates with their organizations and report back any comments. (Judy Suzuki, John Shirey)

Cc: drupal_oei_support  
Subject: RE: /climatechange/kids is still live

Regarding www3 pages:
Please note that www3.epa.gov Akamai is set up as a failover. Unlike www.epa.gov, Akamai does not routinely serve content. Akamai only comes into the picture if www3.epa.gov is down. In that case, Akamai will serve the www3.epa.gov content that we rsync over there nightly.

Redirects and .htaccess files do not go over to Akamai for www3.epa.gov. What that means is that until the actual files are deleted off the server and rsync picks up that change — if www3.epa.gov were to go down, and Akamai were to begin serving that content, Akamai will serve the content upon itself.

Another way of saying that:

If www3.epa.gov were to go down, users could put www3.epa.gov/climatechange/kids in their browser and they would get the content that we have been redirecting away from.

The appliance is being pretty persistent, hanging on to the URLs in those web areas after a do not crawl and a forced recrawl. It's because this is a full feed. I will generate explicit deletes in a feed this morning and remove them.

<image001.gif>

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Subject: RE: May Web Council Weekly

Thanks Judy. I made one small revision highlighted below. Let me know if you agree with the change.

May Web Council Meeting Highlights

On Wednesday, May 10, the Web Council met to discuss updating websites, new features, and revised standards. JP Freire started the meeting off by explaining that the 2017 administration is busy reviewing EPA’s many websites. Blocks of web content have been moved offline to undergo review (press release). Next, Jessica Orquina went over the updated external link procedure. Linking to external sites that have requests for monetary donations or solicit memberships is not allowed. However, if EPA has a formal agreement in place such as a Memorandum of Understanding, then the external link may be posted. Next, Mike Hessling showed off the new LinkIt tool in Drupal, which enables you to quickly set up a link to a page within a web area. Users can search for links by node number, within their own web areas, or pull up links across epa.gov. Next, Sylvette Games gave an update on OMB Memo 17-06, which details 18 requirements that agencies must follow for their public websites. www.epa.gov complied with all requirements, however some other domains and subdomains that come from EPA may not yet be in compliance with these requirements. Next, Angela Shogren briefed the group on the revised Web Standards and asked that everyone review the proposed revisions by May 26. The Web Council members will share these updates with their organizations and report back any comments. (Judy Suzuki, John Shirey)

Another way of saying that:

If www3.epa.gov were to go down, users could put www3.epa.gov/climatechange/kids in their browser and they would get the content that we have been redirecting away from.

The solution is to delete the content from the www3.epa.gov servers so that rsync will remove it from Akamai. Removing it from Akamai will gain us nothing because the rsync will come right behind us and put it back there.

The explicit deletes for everything are processing, and beginning to be reflected in results.

The appliance won't delete full feed URLs that are excluded by a Do Not Crawl, but won't process a DELETE for it either. You have to remove the DNC, process the feeds, then restore the DNC entries.

The appliance is being pretty persistent, hanging on to the URLs in those web areas after a do not crawl and a forced recrawl. It's because this is a full feed. I will generate explicit deletes in a feed this morning and remove them.

Peter,

Is there anything extra we need to do for search?

We redirected a bunch of climate change sites to a signpost page at
https://www.epa.gov/sites/production/files/signpost/cc.html

and we redirected clean power plan and toolbox to
https://wcms.epa.gov/Energy-Independence

Thanks

Le Ann,

According to the written direction below from JP Freire and confirmed by Matt Leopard, Office Director of OIM, please redirect the following sites

To https://www.epa.gov/sites/production/files/signpost/cc.html

Climate Change: www.epa.gov/climatechange

Climate Change Science: www.epa.gov/climate-change-science

Climate Change Impacts: www.epa.gov/climate-impacts

Climate and Energy Resources for State, Local, and Tribal Governments: www.epa.gov/state-local-climate

Students’ Guide to Global Climate Change: www.epa.gov/climatechange/kids

I am creating a new JIRA ticket and will reply with the #.

I will help with testing.

I have told them it may take up to one hour to complete these steps:

1. Put in redirects related to CC
2. Re start apache webservers one at a time
3. Test some important CC related URLs

Subject: Request for time-sensitive website assistance

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

<image001.gif>

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.
The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Subject: Request for time-sensitive website assistance

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we'll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Lin,

There’s been some concern that the Student's Guide to Global Climate Change website is not part of the Snapshot. For instance, please see this analysis: https://envirodatagov.org/wp-content/uploads/2017/05/EPA-Students-Guide-to-Global-Climate-Change.pdf

Can you please have your staff check into this issue and determine whether or not that website is missing or inappropriately linked.

Ex. 5 - Deliberative Process
Ex. 5 - Deliberative Process

Thanks.

Steve
John and Mike,
We need to follow up on this issue on Monday.

It seems we need to delete the w3 CC content that would still be served up if we go into failover.

But we have to be careful because some of it like GHG is still up.

Thank You
Susan Fagan

---

Regarding www3 pages:

Please note that www3.epa.gov Akamai is set up as a failover. Unlike www.epa.gov, Akamai does not routinely serve content. Akamai only comes into the picture if www3.epa.gov is down. In that case, Akamai will serve the www3.epa.gov content that we rsync over there nightly.

Redirects and .htaccess files do not go over to Akamai for www3.epa.gov. What that means is that until the actual files are deleted off the server and rsync picks up that change – if www3.epa.gov were to go down, and Akamai were to begin serving that content, Akamai will serve the content upon itself.
Another way of saying that:

If www3.epa.gov were to go down, users could put www3.epa.gov/climatechange/kids in their browser and they would get the content that we have been redirecting away from.

The solution is to delete the content from the www3.epa.gov servers so that rsync will remove it from Akamai. Removing it from Akamai will gain us nothing because the rsync will come right behind us and put it back there.

While I feel (somewhat) ok about editing an .htaccess file, I don’t think it is within my tasking to delete customer code off the server without specific written direction. Please advise on how to proceed.

Try it out now.

To accomplish list, I edited the .htaccess file located here:
/public/data/oppeoe1/www3/climatechange

We would not ordinarily do this as this would be customer code but I have made assumption that it is ok to do that in this case.

I found some others on the www3.epa.gov site which are not redirecting to www.epa.gov and thus to the cc page. Need direction on what to do with those.

Overview site containing: climate basics, FAQs, glossary, newsroom, what EPA is doing, what you can do, regulatory initiatives, voluntary climate programs, international climate programs, economic analyses, EPA Adaptation Collaboration, Endangerment materials and links to other climate microsites.

Related Microsites:

Climate Change Science: [www.epa.gov/climate-change-science](http://www.epa.gov/climate-change-science)

Climate science overview, causes of climate change, future of climate change, extreme weather. Links to other microsites.

Climate Change Impacts: [www.epa.gov/climate-impacts](http://www.epa.gov/climate-impacts)

Impacts by sector and region, climate and health resources.

Climate and Energy Resources for State, Local, and Tribal Governments: [www.epa.gov/statelocalclimate](http://www.epa.gov/statelocalclimate)

Students’ Guide to Global Climate Change:
[www.epa.gov/climatechange/kids](http://www.epa.gov/climatechange/kids)
Clean Power Plan (www.epa.gov/cleanpowerplan)
Susan, please provide further direction if you would. As we discussed in chat, if we direct all content under www3.epa.gov/climatechange to the

https://www.epa.gov/sites/production/files/signpost/cc.html

page, we may impact content which is already being handled by redirects to existing sites, and thus create unintended impacts.

Example:

https://www3.epa.gov/climatechange/ghgemissions/usinventoryreport/archive.html

Peter,

Is there anything extra we need to do for search?

We redirected a bunch of climate change sites to a signpost page at https://www.epa.gov/sites/production/files/signpost/cc.html

and we redirected clean power plan and toolbox to https://wcms.epa.gov/Energy-Independence

Thanks

Le Ann,

According to the written direction below from JP Freire and confirmed by Matt Leopard, Office Director of OIM, please redirect the following sites

To https://www.epa.gov/sites/production/files/signpost/cc.html

Climate Change: www.epa.gov/climatechange

Climate Change Science: www.epa.gov/climate-change-science

Climate Change Impacts: www.epa.gov/climate-impacts

Climate and Energy Resources for State, Local, and Tribal Governments: www.epa.gov/statelocalclimate

Students’ Guide to Global Climate Change: www.epa.gov/climatechange/kids

I am creating a new JIRA ticket and will reply with the #.

I will help with testing.

I have told them it may take up to one hour to complete these steps:

1. Put in redirects related to CC
2. Re start apache webservers one at a time
3. Test some important CC related URLs
Thanks

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Climate Change: www.epa.gov/climatechange

Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC
2. Restart apache webservers one at a time
3. Test some important CC related URLs

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to
https://www.epa.gov/sites/production/files/signpost/cc.html

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.
Please let us know if you have questions.

Thank you

Climate Change Home

Greenhouse Gas Emissions

Overview of Greenhouse Gases

Sources of Greenhouse Gas Emissions

Global Emissions

National Emissions

Facility-Level Emissions

Carbon Footprint Calculator

GHG Equivalencies Calculator

U.S. Greenhouse Report: 1990-

About the Emissions

EPA develops an annual report called the Greenhouse Gas Emissions and Sinks to report total annual U.S. emissions and removals, by sector, and greenhouse gas going back to 1990. The report uses energy data, data on national agriculture statistics, national statistics to provide a comprehensive picture of greenhouse gas emissions for all man-made sources. EPA also collects greenhouse gas emissions for individual facilities and suppliers of certain industrial gases through the Greenhouse Gas Reporting Program.

The national greenhouse gas inventory includes:

- Emissions from various sectors including transportation, electricity generation, and industrial processes.
- Contributions from stationary sources like power plants and factories.
- Impact of land use changes, particularly deforestation.

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Hi Nancy,
We have to purge the cache every time we change the page.

Here is the latest version on our server:

http://origin-www2.epa.gov/sites/production/files/signpost/cc.html

this will start to show up at

https://www.epa.gov/sites/production/files/signpost/cc.html

and then once you all publish the news release, we will update it again and purge the cache again.

Hi there –

So we have this now – just wondering how we should coordinate timing – as we need to send the press release once everything is done and then that link needs to go in the custom 404 notice.

Do we have a sense of timing?

Thanks much

Subject: Request for time-sensitive website assistance

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we’ll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Climate Change: www.epa.gov/climatechange

Overview site containing: climate basics, FAQs, glossary, newsroom, what EPA is
doing, what you can do, regulatory initiatives, voluntary climate programs, international climate programs, economic analyses, EPA Adaptation Collaboration, Endangerment materials and links to other climate microsites.

Related Microsites:

**Climate Change Science:** [www.epa.gov/climate-change-science](http://www.epa.gov/climate-change-science)

Climate science overview, causes of climate change, future of climate change, extreme weather. Links to other microsites.

**Climate Change Impacts:** [www.epa.gov/climate-impacts](http://www.epa.gov/climate-impacts)

Impacts by sector and region, climate and health resources.

**Climate and Energy Resources for State, Local, and Tribal Governments:** [www.epa.gov/statelocalclimate](http://www.epa.gov/statelocalclimate)

**Students’ Guide to Global Climate Change:** [www.epa.gov/climatechange/kids](http://www.epa.gov/climatechange/kids)

**Clean Power Plan** ([www.epa.gov/cleanpowerplan](http://www.epa.gov/cleanpowerplan))
It may be a cache issue – however can we double check that the ghginventory still comes up?

Thanks

The redirects are in and we believe they are all working.

Pages are being purged from Akamai, although it may take up to 30 more minutes for them all to clear.

They clear fast but one by one.

Thanks

Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC

2. Re start apache web servers one at a time

3. Test some important CC related URLs

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to https://www.epa.gov/sites/production/files/signpost/cc.html

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we'll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.

Please let us know if you have questions.

Thank you

Climate Change: www.epa.gov/climatechange

I found one issue so far. There is a contact us link and you can fill it out, but if you hit submit you get the signpost page.

Mike do you know if that means:

1. Comments don’t submit
2. Comments do submit but the Thank you page does not work.
3. Both?

Thanks

I am able fetch them from drupal1 using curl. So the question is, what does the archive process change about the document. All three are DocumentType "page", so there is no PDF to fetch. The <div class="archive"></div> is already inserted. Is the archive process also changing links to www documents outside the web area from / to https://www.epa.gov?

All right. This took me about 90 minutes to do 108 pages, and it's not going to get easier, I don't think.

I've finally figured out why bulk archive doesn't work 100% ... we get rate limited by Akamai. Bulk archive goes too fast. I resorted to doing the archiving 1-by-1. It's not too slow once you get a rhythm (gonna get you), but tedious since I waited until the page was definitely archived before hitting the next.
The bulk archive missed four files, highlighted in yellow in the attached spreadsheet. I found three of them stuck in the queue for archiving state (so at least that fails gracefully).

https://www.epa.gov/clean-power-plan/clean-power-plan-resources-communities
https://www.epa.gov/clean-power-plan/clean-power-plan-what-epa-doing
https://www.epa.gov/clean-power-plan/clean-power-plan-outreach-summary

(All three are attached.)

Missing: clean-power-plan-and-carbon-pollution-standards-regulatory-actions. I find no evidence of a redirect to some other page (like clean-power-plan-existing-power-plants-regulatory-actions??), but I could be wrong.

What's the best way to get those three files over to archive?

Tomorrow morning, I will archive clean-power-plan. Tomorrow during the day, you'll want to rename the ARCHIVED clean-power-plan back to cleanpowerplan using your Perl script.

No that is not what I mean. In order to successfully run the archive process from the webcms, the “wget” command needs to work and get to the content, and not get redirect to energy independence. So Mike has to rename the real site, long enough for the archive process to get carried out.

How can we keep [www.epa.gov/clean-power-plan](http://www.epa.gov/clean-power-plan)

from getting into search results when Mike renames the existing [www.epa.gov/cleanpowerplan](http://www.epa.gov/cleanpowerplan) website.

Re: Danny said you can archive Clean Power Plan. How do we keep it from getting into our own search results?

Do you mean keep the temporary archive directory from getting into our search results?  [www.epa.gov/cleanpowerplan](http://www.epa.gov/cleanpowerplan) is long gone from our search results, and archive is categorically excluded from default search results. I'm assuming that there are no restrictions on what you can find in archive if you do an explicit archive search, right?

As far as archiving, you will move the content to something like [archive.epa.gov/epa/clean-power-plan](http://archive.epa.gov/epa/clean-power-plan) and I will update the links and move it to [archive.epa.gov/epa/cleanpowerplan](http://archive.epa.gov/epa/cleanpowerplan)?

I am tied up from 3:30 until 7:00pm but I can easily have this done this evening before indexing runs. If for any reason I cannot complete it, I will make sure the temporary directory is not indexed. But thanks for the consideration on the timing.

I would do this archiving early in the morning and go as fast as I can. Wouldn't that prevent the
indexing?

The URL pattern would be "clean-power-plan" if that helps (changed from "cleanpowerplan").

He understands that you will need to temporarily rename it with an obscure appendage or something to make it not caught by the redirect.

He also understands that it will appear on the Web Topics Published list for a bit.

I told him it would not appear in our EPA search results, so Peter what do you need to do to not feed yourself the (new) web area when Mike renames it?

cleanpowerplan.xlsx
clean-power-plan-outreach-summary.html
clean-power-plan-what-epa-doing.html
clean-power-plan-resources-communities.html

All right. This took me about 90 minutes to do 108 pages, and it's not going to get easier, I don't think.

I've finally figured out why bulk archive doesn't work 100% ... we get rate limited by Akamai. Bulk archive goes too fast. I resorted to doing the archiving 1-by-1. It's not too slow once you get a rhythm (gonna get you), but tedious since I waited until the page was definitely archived before hitting the next.

The bulk archive missed four files, highlighted in yellow in the attached spreadsheet. I found three of them stuck in the queue for archiving state (so at least that fails gracefully).

https://www.epa.gov/clean-power-plan/clean-power-plan-resources-communities
https://www.epa.gov/clean-power-plan/clean-power-plan-what-epa-doing
https://www.epa.gov/clean-power-plan/clean-power-plan-outreach-summary

(All three are attached.)

Missing: clean-power-plan-and-carbon-pollution-standards-regulatory-actions. I find no evidence of a redirect to some other page (like clean-power-plan-existing-power-plants-regulatory-actions??), but I could be wrong.

What's the best way to get those three files over to archive?

Tomorrow morning, I will archive clean-power-plan. Tomorrow during the day, you'll want to rename the ARCHIVED clean-power-plan back to cleanpowerplan using your Perl script.

Subject: RE: Danny said you can archive Clean Power Plan. How do we keep it from getting into our own search results?

No that is not what I mean. In order to successfully run the archive process from the webcmsgz, the “wget” command needs to work and get to the content, and not get redirect to energy independence. So Mike has to rename the real site, long enough for the archive process to get carried out.

How can we keep www.epa.gov/clean-power-plan

from getting into search results when Mike renames the existing www.epa.gov/cleanpowerplan website.

Do you mean keep the temporary archive directory from getting into our search
results?  www.epa.gov/cleanpowerplan is long gone from our search results, and
archive is categorically excluded from default search results. I'm assuming that
there are no restrictions on what you can find in archive if you do an explicit archive
search, right?

As far as archiving, you will move the content to something like
archive.epa.gov/epa/clean-power-plan and I will update the links and move it to
archive.epa.gov/epa/cleanpowerplan?

I am tied up from 3:30 until 7:00pm but I can easily have this done this evening
before indexing runs. If for any reason I cannot complete it, I will make sure the
temporary directory is not indexed. But thanks for the consideration on the timing.

I would do this archiving early in the morning and go as fast as I can. Wouldn't that prevent the indexing?

The URL pattern would be "clean-power-plan" if that helps (changed from "cleanpowerplan").

He understands that you will need to temporarily rename it with an obscure appendage or something to make it not caught by the redirect.

He also understands that it will appear on the Web Topics Published list for a bit.

I told him it would not appear in our EPA search results, so Peter what do you need to do to not feed yourself the (new) web area when Mike renames it?

Clean Power Plan Outreach Summary

Proposed Federal Plan and Model Rules for the Clean Power Plan

As part of the comment period on the proposed Federal Plan and Model Rules for the Clean Power Plan, EPA is asking for information and comments from communities, states, tribes and other stakeholders. EPA has held several public hearings throughout the U.S. in different cities to obtain input before the comment period closes on January 21, 2016.

In addition, EPA held a series of teleconferences about the design of the Clean Energy Incentive Program (CEIP). These teleconferences, held in November/December 2015, have offered a variety of interested parties and community members the opportunity to share their ideas about the CEIP. Written comments about the CEIP can also be submitted through December 15, 2015, for those who missed the teleconferences.

Beginning in October 2015, the agency hosted trainings on the proposed Federal Plan and Model Rules and CEIP in Las Vegas, NV for tribes and in Port Arthur, TX for communities. A second community training will be held December 15-16, 2015 in Washington, DC and additional tribal trainings are planned for December 7-8 in Farmington, NM and December 9-10 in Tuba City, AZ. More information about registering for these events is below.

In the coming weeks, EPA regional offices will be connecting with communities about the proposed Federal Plan and Model Rules, including sharing information about the CEIP. These
meetings, webinars, and teleconferences continue the Agency’s efforts to solicit feedback and comments from communities about these actions that would reduce carbon pollution from existing power plants across the nation.

Clean Power Plan

Clean Power Plan Resources for Communities

This webpage provides resources to help inform overburdened communities about the final Clean Power Plan and the proposed Federal Plan Requirements for Greenhouse Gas Emissions from Electric Utility Generating Units Constructed on or Before January 8, 2014; Model Trading Rules (this rulemaking will be henceforth referred to as the proposed federal plan). Additionally, this website provides resources that the EPA is making available to help communities engage with their states as they implement their plans and to assist communities in engaging with the EPA throughout the comment period for the proposed federal plan.

The Clean Power Plan will provide broad benefits to communities across the nation, as its purpose is to reduce greenhouse gases, the most significant driver of climate change. While addressing climate change will provide broad benefits, it is particularly beneficial to low-income communities of color that are already overburdened with pollution and that are more likely to be disproportionately affected by, and less resilient to, the impacts of climate change.

The electricity sector is, and will continue to be, investing more in renewable energy and energy efficiency. It is important to ensure that all communities share in these benefits.

Clean Power Plan: What EPA is Doing

On this page:

- Developing carbon pollution standards under the Clean Air Act
- Overview presentation of Clean Air Act Section 111
- Reducing carbon pollution from the power sector

Related Information

- What EPA is doing about climate change
- Climate change regulatory initiatives

Developing carbon pollution standards under the Clean Air Act

The Clean Air Act lays out distinct approaches for new and existing sources under Section 111: a federal program for new sources and state programs for existing sources. EPA is using its authority under section 111 of the Clean Air Act to issue standards, regulations or guidelines, as appropriate that address carbon pollution from new and existing power plants, including modifications of those plants. This section of the Act establishes a mechanism for controlling air pollution from stationary sources.
Section 111 (b) is the federal program to address new, modified and reconstructed sources by establishing standards.

Section 111 (d) is a state-based program for existing sources. The EPA establishes guidelines. The states then design programs that fit in those guidelines and get the needed reductions.

Overview presentation of Clean Air Act Section 111

The following overview presentation provides a basic understanding of Clean Air Act section 111 and how it will inform the design of the program.

Reducing carbon pollution from the power sector

In the Clean Air Act, Congress recognized that the opportunity to build emissions controls into a source's design is greater for new sources than for existing sources, so it laid out different approaches to set the two types of standards.

On September 20, 2013, EPA proposed carbon pollution standards for power plants built in the future and kicked off the process of outreach with states, stakeholders and the public to establish carbon pollution standards for currently operating power plants.

On June 2, 2014, EPA, under President Obama's Climate Action Plan, proposed a commonsense plan to cut carbon pollution from existing power plants. The Clean Power Plan will maintain an affordable, reliable energy system, while cutting pollution and protecting our health and environment now and for future generations.

On October 28, 2014, EPA issued a supplemental proposal to the Clean Power Plan to address carbon pollution from affected power plants in Indian Country and U.S. territories.

Subject: RE: Student's Guide to Global Climate Change website

Hi Steve,

The Student's Guide to Global Climate Change pages are not included in the snapshot. They were overlooked because, unlike the rest of the climate change pages, the “kids” pages were not transformed into Drupal. When we conducted our quick analysis of what need to be migrated from W3, we overlooked the climate change “kids” pages because the other climate change pages were already in Drupal. With such a quick turnaround time, no one noticed the oversight.

Ex. 5 - Deliberative Process
We are working on adding it to the archive right now. It should be available in archive no later than tomorrow COB. Let me know if you have questions or if you would like us to take a different approach.

Thanks,

Lin

Subject: Draft Email to OPA on "managing expectations" when it comes to taking down content

Hi Matt and Maja,

Following up on our conversation with Harvey yesterday, I have drafted the email below to send to OPA. Danny and I had a conversation about it this morning, but I want to follow up with an email. Please let me know your thoughts. I want it to come across as constructive, not obstructive.

Hi Danny,

As you know, OEI’s Web Division is committed to helping OPA manage web content and we are at your service when it comes to getting emergency system-wide changes implemented as quickly as possible. **As you know, EPA web content is typically managed at the program office or regional level, and each office/region has their own web content management experts that OPA can engage to affect changes to web content, as necessary.** We are also available to help in exceptional cases where OEI assistance is needed to help quickly remove content that belongs to other program offices. In order to provide clear and consistent direction for our staff, we need to establish a process for these types of requests. Please send requests for OEI assistance in taking down content that belongs to other offices through Steve Fine and Harvey Simon. They will then provide the direction to OEI staff and we will, of course, implement the requests with all due haste. Please keep in mind that, due to technical and procedural considerations (such as clearing old pages from server cache, establishing redirects, and updating search results), these requests could take up to 8 hours to complete.

Sending these requests through the CIOs office will help to establish them as our immediate top priorities and move them ahead of our other commitments. You and I can continue to work together closely to work out the implementation details as quickly as possible, but in order to manage workload and expectations, the official request needs to go through the CIO.

Please let me know if you have any questions or need any additional information.
Thanks

Lin

“Never underestimate the power of a small group of committed people to change the world. In fact, it is the only thing that ever has.” ~ Margaret Mead
Correct. I believe OCAPPM manages the content for About OEI.

Just as a point of clarification, I feel I should mention that this past Friday we (WCSD) helped OPA implement some major changes related to the energy independence site. We took down the Clean Power Plan and Clear Power Plan Toolbox sites and redirected those links to the energy independence site. We also took down the Climate Change site based on direction from OPA. That’s a change that caught quite a bit of press over the weekend. (e.g. EPA website removes climate science site from public view after two decades)

Let me know if you have questions or need any additional information.

Thanks,

Lin

Subject: Website Management: Energy Independence?

Hi Lin,

Do we in OEI manage this Energy Independence web page: https://www.epa.gov/energy-independence?

As I understand, we do a lot of work on the framework/back end for many EPA web pages, but most of the www.epa.gov internet pages (including content) are maintained and managed by other program offices. Is that true? I ask because I’m trying to understand OEI’s role for the internet – and especially this particular page – better as EPA web pages are shifting around, causing more press inquiries into the agency.

Thanks,

Annie

Subject: RE: Weekly Report Draft WCSD web team implements Office of Public Affairs website changes

Draft:

**WCSD web team implements Office of Public Affairs website changes** - On Friday April 28, members of the Web Content Services Division carried out the directions of Office of Public Affairs to redirect some EPA public websites to new locations. Working with contractor staff, OEI redirected [www.epa.gov/climatechange](http://www.epa.gov/climatechange) to a static page explaining “We are currently updating our website to reflect EPA's priorities under the leadership of President Trump and Administrator Pruitt. “ WCSD staff took other steps to clear the Climate Change website content
quickly from the Akamai content delivery network so that OPA could issue their News Release referencing the new information. In addition, WCSD staff redirected the Clean Power Plan and Clean Power Plan Toolbox to the new Energy Independence site. WCSD staff also directed the EPA search team to remove some of affected URLs from EPA search results and fixed some issues with other redirects on www3.epa.gov.

Subject: RE: request for Web Council topic

I just spoke to our AA, JP Freire, he’s asked to speak to the Web Council personally. Can we add him on the agenda for 10 mins at the beginning?

Thanks for the suggestion Evonne.

Judy: Please add this to the draft agenda for our next Web Council Meeting.

Danny: Let us know if you have any objections to adding it to the agenda. Also, it might not be a bad idea to send a quick note about this to the Web Council today just so they’re in the loop. What do you think?

Hi All,

All of the requested changes have been implemented. The redirects are in and tested. The old pages have been purged and our Content Delivery Network (Akamai) is serving the new pages.

Thanks to Susan Fagan and Michael Hessling for putting in a little extra time on a Friday night to make this happen. The Web Team always seems to come through for the Agency in the clutch. And thanks to OPA for providing clear direction.

If anyone notices any problems over the weekend, please feel free to call me at 202-566-0696 or Susan at 202-566-2021. We both have our desk numbers rolling over to our cells. As usual Michael will be monitoring traffic over the weekend to make sure our network is able to handle a surge in traffic if necessary.

Have a great weekend everyone.

Cheers,

Lin

Greenhouse Gas Emissions

Climate Change Home

Greenhouse Gas Emissions

Overview of Greenhouse Gases

Sources of Greenhouse Gas Emissions

Global Emissions

National Emissions

Facility-Level Emissions

Carbon Footprint Calculator

GHG Equivalencies Calculator

U.S. Greenhouse Report: 1990-

About the Emissions

EPA develops an annual report called the Greenhouse Gas Emissions and Sinks (http://www.epa.gov/energy/gge.html) to provide comprehensive information on total annual U.S. emissions and removals of greenhouse gases. The report includes data on national agriculture statistics to provide a comprehensive accounting of greenhouse gas emissions for all man-made sources in the U.S. EPA also collects greenhouse gas data from individual facilities and suppliers of certain industrial gases through the Greenhouse Gas Reporting Program.

The national greenhouse gas inventory is used by the government and industries to track progress toward reducing greenhouse gas emissions. The inventory is also used by scientists and policymakers to develop strategies to mitigate climate change.

Nancy and Matt,

Here are the actions that need to occur.

1. Put in redirects related to CC
2. Re start apache webservers one at a time
3. Test some important CC related URLS

Once the global redirect is in place (1), the CC site will no longer be findable to the public and instead the visitors will go to
https://www.epa.gov/sites/production/files/signpost/cc.html
Thanks

Steve, Harvey and Matt,

As discussed with Nancy, we would like the content at the links below removed and archived as soon as possible.

The removed climate change pages will be replaced with a custom page that will explain why the change is happening, include a link to the January 19, 2017 snapshot of the EPA website, and a link to the press release we'll be putting out.

The clean power plan pages will be redirected to the newly posted energy independence pages.

We appreciate your assistance in this time-sensitive matter.
Please let us know if you have questions.

Thank you

Subject: Late Weekly Entry for OIM

Hi John,

Here is the weekly we discussed. Thanks.

May Web Council Meeting Highlights

On Wednesday, May 10, the Web Council met to discuss updating websites, new features, and revised standards. JP Freire started the meeting off by explaining that the 2017 administration is busy reviewing EPA's many websites. Blocks of web content have been moved offline to undergo review (press release). Next, Jessica Orquina went over the updated external link procedure. Linking to external sites that have requests for monetary donations or solicit memberships is not allowed. However, if EPA has a formal agreement in place such as a Memorandum of Understanding, then the external link may be posted. Next, Mike Hessling showed off the new LinkIt tool in Drupal, which enables you to quickly set up a link to a page within a web area. Users can search for links by node number, within their own web areas, or pull up links across epa.gov. Next, Sylvette Games gave an update on OMB Memo 17-06, which details 18 requirements that agencies must follow for their public websites. www.epa.gov complied with all requirements, however some other domains and subdomains that come from EPA may not yet be in compliance with these requirements. Next, Angela Shogren briefed the group on the revised Web Standards and asked that everyone review the proposed revisions by May 26. The Web Council members will share these updates with their organizations and report back any comments. (Judy Suzuki, John Shirey)

Hi Yvonne,

Can we add one more entry?

**May Web Council Meeting Highlights**

On Wednesday, May 10, the Web Council met to discuss updating websites, new features, and revised standards. JP Freire started the meeting off by explaining that the 2017 administration is busy reviewing EPA’s many websites. Blocks of web content have been moved offline to undergo review (press release). Next, Jessica Orquina went over the updated external link procedure. Linking to external sites that have requests for monetary donations or solicit memberships is not allowed. However, if EPA has a formal agreement in place such as a Memorandum of Understanding, then the external link may be posted. Next, Mike Hessing showed off the new LinkIt tool in Drupal, which enables you to quickly set up a link to a page within a web area. Users can search for links by node number, within their own web areas, or pull up links across epa.gov. Next, Sylvette Games gave an update on OMB Memo 17-06, which details 18 requirements that agencies must follow for their public websites. [www.epa.gov](http://www.epa.gov) complied with all requirements, however some other domains and subdomains that come from EPA may not yet be in compliance with these requirements. Next, Angela Shogren briefed the group on the revised Web Standards and asked that everyone review the proposed revisions by May 26. The Web Council members will share these updates with their organizations and report back any comments. (Judy Suzuki, John Shirey)

Subject: Student's Guide to Global Climate Change website

Lin,

There’s been some concern that the Student's Guide to Global Climate Change website is not part of the Snapshot. For instance, please see this analysis: https://environetrends.org/wp-content/uploads/2017/05/EPA-Students-Guide-to-Global-Climate-Change.pdf

Can you please have your staff check into this issue and determine whether or not that website is missing or inappropriately linked.

Ex. 5 - Deliberative Process

Thanks.

Steve
Hi Matt,

This action has not been approved yet. Maja and Steve worked out a process by which the approval will come down the chain of command through Steve. It’s not yet clear whether we’ll get something in writing or not.

Hi Steve,

The top nav includes an link to the environmental topics page which includes a link to the climate change page. If we had taken down the climate change page tonite, that link would have broken.

If we take it down tomorrow, we'll have time to fix that link and others so it shouldn't be a problem.

Let me know if you have more questions.

Hi Lin,
You mentioned today that removing sections of the web site would create broken links. Can you please elaborate on that, e.g., where and how serious would the problem be? Would the topics be removed from the top navigation? Are there any other issues that you are aware of?

No action has been requested. I’d just like to understand the issues.

Thanks.

Steve

When changes were made to the EPA website some of the links were broken. We are working with technical staff to correct the links now that this has been brought to our attention.

In the meantime, information on the endangerment finding can be found here: https://www.epa.gov/ghgemissions/endangerment-and-cause-or-contribute-findings-greenhouse-gases-under-section-202a-clean

Barring any technical problems, the links to supporting documents should be working again in 2-3 hours.

Isabel's cranking away on the fastest way to fix the links now.

This is the page that is live: https://www.epa.gov/ghgemissions/endangerment-and-cause-or-contribute-findings-greenhouse-gases-under-section-202a-clean

Unfortunately, when this page was moved, the underlying content wasn't (it was moved into
the archives), so many of the links on the live page are broken.
