

**IMPORTANT NOTES:**

*These tables likely do not contain all SIN List chemicals or all companies producing or importing SIN List chemicals in the U.S.: EPA regulations under the Toxic Substances Control Act (TSCA) allow a company to claim the identity of a chemical it produces, or the company's association with a chemical, to be confidential business information. Any such chemicals or companies were excluded from the public version of the EPA database, and hence are not represented in these tables.*

*In addition, while we used the most recent public data on U.S. chemical production and import, they are somewhat dated, as they were collected by EPA in 2006 for activity during the single calendar year 2005. Given the dynamic nature of the chemical market, both from year to year and between 2005 and the present, some of the data we report here on chemicals, their production/import volumes and their associated companies may well have changed.*

This document contains the following data tables referred to in *Across the Pond*:

<b>Table 1. Status of SIN List chemicals in the U.S.: Production, testing and regulation.....</b>	<b>2</b>
<b>Table 2. Companies that reported producing or importing SIN List Chemicals in 2006, by company and by CAS number .....</b>	<b>13</b>
<b>A. Listed by company .....</b>	<b>13</b>
<b>B. Listed by CAS number .....</b>	<b>29</b>
<b>Table 3. Number of SIN List chemicals produced or imported in each state and number of sites reported in 2006 .....</b>	<b>45</b>
<b>Table 4. SIN List chemicals produced or imported in each state reported in 2006 .....</b>	<b>46</b>

**Table 1. Status of SIN List chemicals in the U.S.: Production, testing and regulation<sup>1</sup>**

CAS#	Chemical name(s)	Basis for including on SIN List	On TSCA Inventory ?	In US commerce in 2001 at >10K lbs/yr?	In US commerce in 2005 at >25K lbs/yr?	2005 production/import volume (lbs)	# of reporting companies in 2005	# of sites in 2005	Subject to mandatory testing under TSCA?	Tested voluntarily ?	Voluntary program status	Regulated or exempted under TSCA?

SOURCES: See Appendix in main report.

**Entry Notes:**

For CAS#s 1763-23-1 (perfluorooctane sulfonic acid, PFOS) and 4151-50-2 (perfluorooctane sulfonamide, PFOSA), their sole U.S. manufacturer (3M Company) ceased manufacture in 2002, so these chemicals are no longer in active U.S. commerce.

For CAS# 335-67-1 (perfluorooctanoic acid, PFOA), 3M ceased manufacture in 2002 but DuPont then began manufacture.

For CAS# 25637-99-4, hexabromocyclododecane: We did all searches in our analysis using that CAS number and a second CAS number, 3194-55-6, which is identified by EPA as corresponding to the same substance – see [www.epa.gov/hpvis/rbp/HBCD.3194556.Web.RBP.31308.pdf](http://www.epa.gov/hpvis/rbp/HBCD.3194556.Web.RBP.31308.pdf). According to EPA: "There are two CAS numbers for HBCD: 1,2,5,6,9,10 hexabromocyclododecane (CAS 3194-55-6) is an HPV chemical that was manufactured or imported in the U.S. between 10 and 50 million pounds in 2005. Hexabromocyclododecane (CAS 25637-99-4) is a moderate production volume (MPV) chemical manufactured or imported between 10 thousand and 500 thousand pounds in 2005." However, only the former is listed in the 2006 IUR database, so data included here are for that CAS number.

Asbestos is listed on the TSCA Inventory as CAS# 1332-21-4, but not as any of the seven CAS numbers listed on the SIN List for various forms of asbestos (12001-28-4, 12001-29-5, 12172-73-5, 132207-32-0, 77536-66-4, 77536-67-5 and 77536-68-6). Data shown for these seven CAS numbers in this table reflect those for CAS# 1332-21-4.

**Column Notes:**

CAS# – Chemical Abstract Service number is a unique chemical identifier; entries are ordered by CAS # in ascending order.

Chemical name(s) – Where more than one is commonly used, each is provided.

Basis for inclusion on SIN List – CMR is carcinogen, mutagen or reproductive toxicant, Classification 1 or 2; PBT is persistent, bioaccumulative and toxic; vPvB is very persistent and very bioaccumulative; "equivalent concern" refers to a substance deemed to present an equivalent level of concern under REACH Article 57(f).

On TSCA Inventory – based on the most recent public version dated July 2008; excludes chemicals with identities claimed to be confidential business information.

In US commerce in 2001 at >10K lbs/yr – indicates if the aggregate volume across all reporting producers and importers of the chemical exceeded the 2001 reporting threshold of 10,000 pounds per year; based on publicly available data collected in the penultimate round of IUR reporting in 2002 for calendar year 2001.

In US commerce in 2005 at >25K lbs/yr – indicates if the aggregate volume across all reporting producers and importers of the chemical exceeded the 2005 reporting threshold of 25,000 pounds per year; based on the most recent publicly available data collected in 2006 for calendar year 2005.

2005 production volume (lbs) – indicates the aggregate range of production plus import volume reported for the chemical; based on the most recent publicly available data collected in 2006 for calendar year 2005; K = one thousand; M = one million; B = one billion.

# of reporting companies in 2005 – indicates the number of companies that reported producing or importing the chemical above the reporting threshold; based on the most recent publicly available data collected in 2006 for calendar year 2005; excludes any companies that claimed their association with the chemical to be confidential business information.

# of sites in 2005 – indicates the number of sites at which companies reported producing or importing the chemical above the reporting threshold; a site is counted twice if the chemical is reported as both manufactured and imported at that same site; based on the most recent publicly available data collected in 2006 for calendar year 2005; excludes any sites that companies claimed to be confidential business information.

Subject to mandatory testing under TSCA – indicates whether EPA has required testing of the chemical under TSCA through a Section 4 test rule or Enforceable Consent Agreement; see Appendix in main report for details.

Tested voluntarily – indicates whether the chemical has been tested in the U.S. under a voluntary program. The Challenge is the U.S. EPA's HPV Challenge Program; entries listing "OECD" refer to Challenge chemicals that are being addressed under a sister HPV program operated under the auspices of the Organization for Economic Cooperation and Development; entries listing "OECD2" refer to chemicals being tested under the OECD program independent of the Challenge; "Orphan" refers to a Challenge chemical that has not been sponsored and for which data development is not taking place.

Voluntary program status – indicates whether testing and data development under the associated voluntary program are done, ongoing or not begun.

Regulated under TSCA – indicates whether a chemical is or has been subject to a TSCA regulation; "SNUR" refers to its coverage under a Significant New Use Rule; "TSCA Sec. 6" indicates a chemical is subject to a regulation restricting its product or use, issued under Section 6 of TSCA; "IUR exempt" indicates that a chemical has been exempted from the regulation that requires periodic reporting of production or import under EPA's Inventory Update Rule (IUR).

**Table 2. Companies that reported producing or importing SIN List Chemicals in 2006, by company and by CAS number<sup>2</sup>**

**Part A. Listed by company**  
**Part B. Listed by CAS number**

**A. Listed by company**

Company	CAS #	Chemical name(s)	Mfr	Imp	CBI
3M	77-78-1	dimethyl sulphate	No	Yes	
	79-06-1	acrylamide; prop-2-enamide	No	Yes	
	80-05-7	bisphenol A	No	Yes	
	28553-12-0	diisononyl phthalate (DINP)	No	Yes	
Aceto Corporation	64-67-5	diethyl sulphate	No	Yes	
	90-04-0	2-methoxyaniline; o-anisidine	No	Yes	
	94-59-7	safrole; 5-allyl-1,3-benzodioxole	No	Yes	
	101-77-9	4,4'-diaminodiphenylmethane; 4,4'-methylenedianiline	No	Yes	
	119-61-9	benzophenone	No	Yes	
	612-83-9	3,3'-dichlorobenzidine dihydrochloride	No	Yes	
ADEKA USA Corporation	28553-12-0	diisononyl phthalate (DINP)	No	Yes	
Advanced Aromatics, L.P.	91-20-3	naphthalene	Yes	Yes	
Akcros Chemicals	84-74-2	dibutyl phthalate (DBP)			CBI
Akrochem Corporation	96-45-7	ethylene thiourea; imidazolidine-2-thione; 2-imidazoline-2-thiol	No	Yes	
Akzo Nobel Coatings Inc.	7789-06-2	strontium chromate	No	Yes	
Albemarle Corporation	75-26-3	2-bromopropane	No	Yes	
	79-94-7	tetrabromobisphenol A (TBBPA)	Yes	No	
	98-54-4	4-tert-butylphenol	Yes	No	
	106-94-5	1-bromopropane; n-propyl bromide	No	Yes	
	1163-19-5	deca-brominated diphenyl ether (DECA)	Yes	No	
	1313-99-1	nickel monoxide	No	Yes	CBI
	3194-55-6*	1,2,5,6,9,10 hexabromocyclododecane	Yes	Yes

		Copeq Trading Co.	No	Yes	
		Univar USA Inc.	No	Yes	

SOURCES: See Appendix in main report.

**Entry Notes:**

\* CAS# 3194-55-6 is identified by EPA as corresponding to the same substance as the SIN List chemical CAS# 25637-99-4: hexabromocyclododecane – see [www.epa.gov/hpvis/rbp/HBCD.3194556.Web.RBP.31308.pdf](http://www.epa.gov/hpvis/rbp/HBCD.3194556.Web.RBP.31308.pdf). According to EPA: "There are two CAS numbers for HBCD: 1,2,5,6,9,10 hexabromocyclododecane (CAS 3194-55-6) is an HPV chemical that was manufactured or imported in the U.S. between 10 and 50 million pounds in 2005. Hexabromocyclododecane (CAS 25637-99-4) is a moderate

production volume (MPV) chemical manufactured or imported between 10 thousand and 500 thousand pounds in 2005." Only the former CAS number appears in the IUR data and is reported in this table.

\*\* For CAS# 335-67-1 (perfluorooctanoic acid, PFOA), 3M ceased manufacture in 2002 but DuPont then began manufacture.

\*\*\* Asbestos is reported by companies under the TSCA Inventory Update using CAS# 1332-21-4 rather than any of the seven CAS numbers listed on the SIN List for various forms of asbestos. Data shown for asbestos in this table, therefore, reflect those reported for CAS# 1332-21-4.

**Column Notes:**

Company name – as reported in the EPA 2006 Inventory Update Rule database.

CAS# – Chemical Abstract Service number is a unique chemical identifier.

Chemical name(s) – Where more than one is commonly used, each is provided.

Mfr/Imp/CBI – Mfr = chemical is manufactured; Imp = chemical is imported; CBI = the information as to whether the chemical is manufactured or imported is claimed as confidential business information. A given chemical may be manufactured, imported and/or claimed CBI by the same company at the same or different sites.

**Table 3. Number of SIN List chemicals produced or imported in each state and number of sites reported in 2006**

\* 42 states, Puerto Rico (PR) and the Virgin Islands (VI) reported producing or importing SIN List chemicals.

\*\* Numbers may not add to total because a chemical may be produced and imported in the same state or site.

**Table 4. SIN List chemicals produced or imported in each state reported in 2006<sup>3</sup>**

State	CAS #	Chemical name(s)	Company	Mfr	Imp	CBI

SOURCES: See Appendix in main report.

**Entry Notes:**

\* CAS# 3194-55-6 is identified by EPA as corresponding to the same substance as CAS# 25637-99-4: hexabromocyclododecane – see [www.epa.gov/hpvis/rbp/HBCD.3194556.Web.RBP.31308.pdf](http://www.epa.gov/hpvis/rbp/HBCD.3194556.Web.RBP.31308.pdf). According to EPA: "There are two CAS numbers for HBCD: 1,2,5,6,9,10 hexabromocyclododecane (CAS 3194-55-6)

is an HPV chemical that was manufactured or imported in the U.S. between 10 and 50 million pounds in 2005. Hexabromocyclododecane (CAS 25637-99-4) is a moderate production volume (MPV) chemical manufactured or imported between 10 thousand and 500 thousand pounds in 2005." Only the former CAS number appears in the IUR data and is reported in this table.

\*\* For CAS# 335-67-1 (perfluorooctanoic acid, PFOA), 3M ceased manufacture in 2002 but DuPont then began manufacture.

\*\*\* Asbestos is reported by companies under the TSCA Inventory Update using CAS# 1332-21-4 rather than any of the seven CAS numbers listed on the SIN List for various forms of asbestos. Data shown for asbestos in this table, therefore, reflect those reported for CAS# 1332-21-4.

**Column Notes:**

State – PR = Puerto Rico; VI = Virgin Islands.

CAS# – Chemical Abstract Service number is a unique chemical identifier.

Chemical name(s) – Where more than one is commonly used, each is provided.

Company name – as reported in the EPA 2006 Inventory Update Rule database.

Mfr/Imp/CBI – Mfr = chemical is manufactured; Imp = chemical is imported; CBI = the information as to whether the chemical is manufactured or imported is claimed as confidential business information. A given chemical may be manufactured, imported and/or claimed CBI by the same company at the same or different sites.
