

## Active oil and gas wells

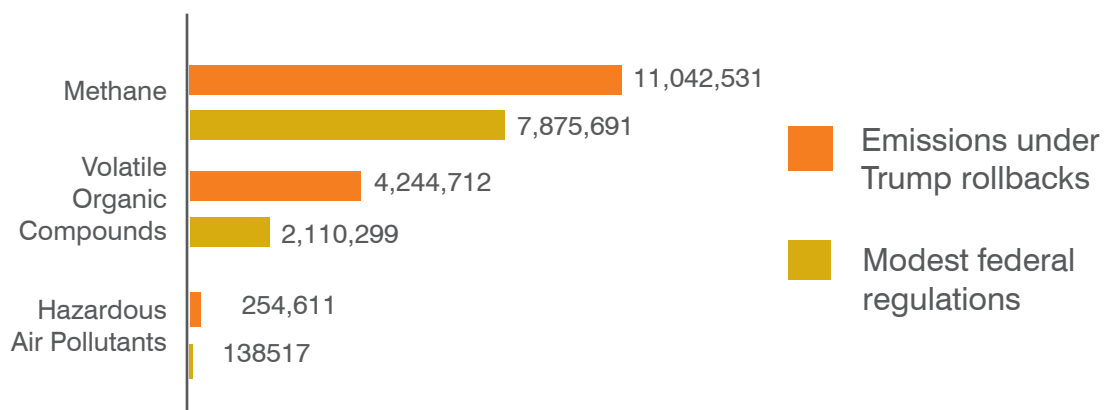

## Impacted communities living within a 1/2 mile radius of an oil or gas well

Impacted community	Total wells	Regulated wells*	Unregulated wells
Total pop.	9,465,487	910,788	9,390,326
Children under 5	605,936	60,810	589,423
Adults over 65	1,427,299	121,562	1,403,557
Below the poverty line	1,420,589	137,837	1,398,860
People of color	2,803,691	429,390	2,776,867

Note: The numbers reflected above may not add up to the total population given that there may be persons living within a half mile of both well types.

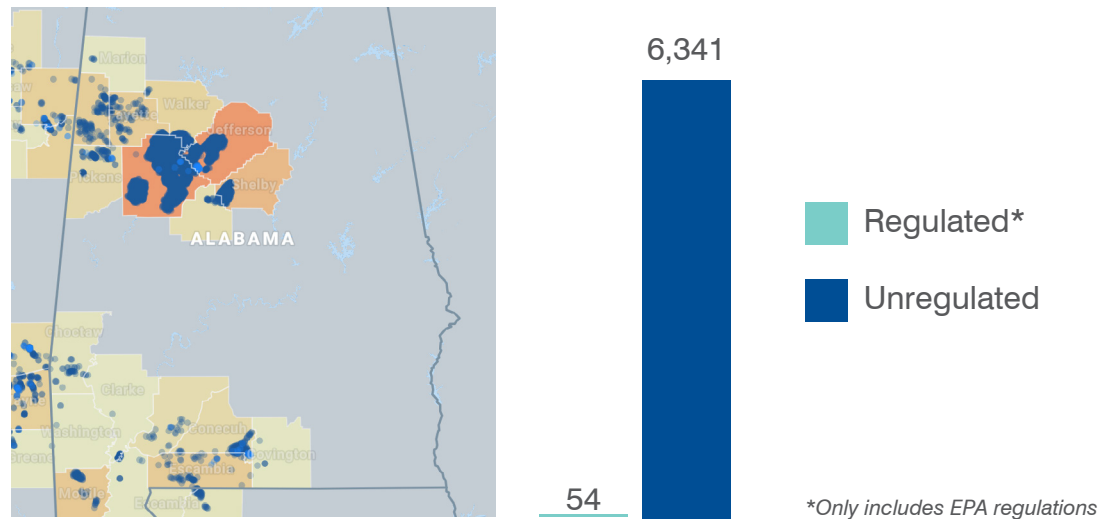

## Projected 2025 Pollution Levels

In metric tons

# Oil and Gas Pollution: Alabama

## Active oil and gas wells

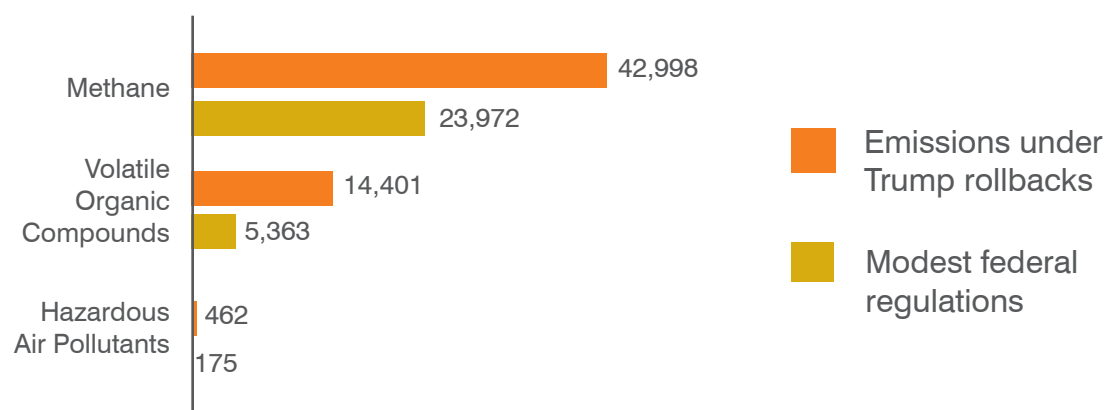

## Impacted communities living within a 1/2 mile radius of an oil or gas well

Impacted community	Total wells	Regulated wells*	Unregulated wells
Total pop.	55,000	660	55,000
Children under 5	3,100	37	3,100
Adults over 65	8,600	120	8,500
Below the poverty line	7,700	150	7,700
People of color	13,000	160	13,000

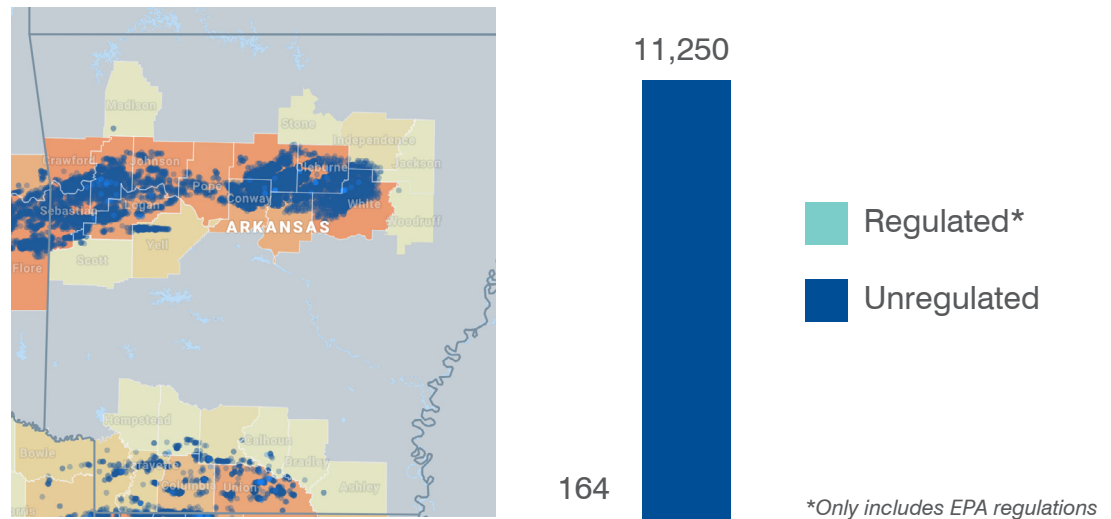

Note: The numbers reflected above may not add up to the total population given that there may be persons living within a half mile of both well types.

## Projected 2025 Pollution Levels

In metric tons

## Active oil and gas wells

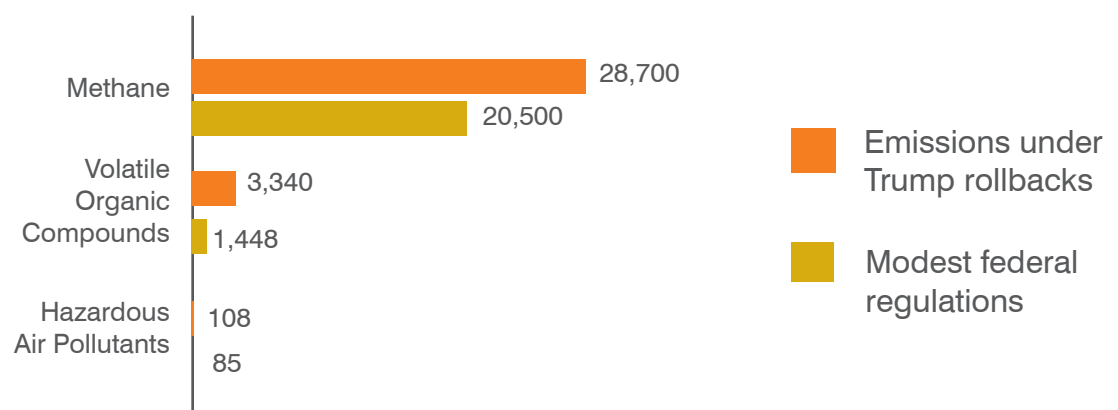

## Impacted communities living within a 1/2 mile radius of an oil or gas well

Impacted community	Total wells	Regulated wells*	Unregulated wells
Total pop.	170,000	2,000	170,000
Children under 5	11,000	120	11,000
Adults over 65	29,000	390	29,000
Below the poverty line	32,000	290	32,000
People of color	32,000	200	32,000

Note: The numbers reflected above may not add up to the total population given that there may be persons living within a half mile of both well types.

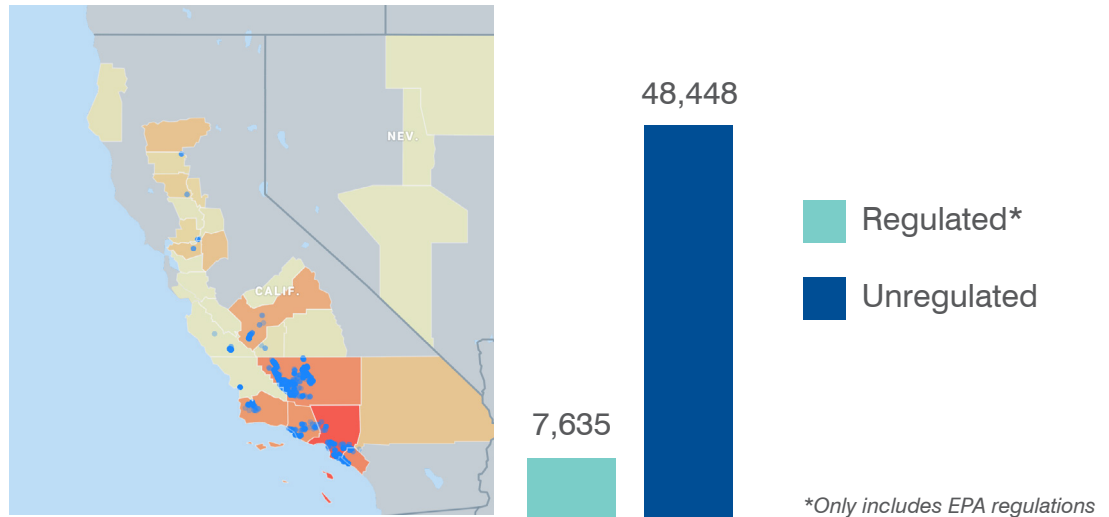

## Projected 2025 Pollution Levels

In metric tons

## Active oil and gas wells

Note: California is one of several states that requires oil and gas companies to reduce emissions. Some of the unregulated federal wells mapped in California would still be subject to California state standards, which the Trump Administration Rollbacks would not affect. We have continued to show which wells would be unregulated by federal standards in California, but have accounted for state standards in our assessment of emissions impacts.

## Active oil and gas wells

Note: Texas is one of several states that requires oil and gas companies to reduce emissions. Some of the unregulated federal wells mapped in Texas would still be subject to Texas requirements, which the Trump Administration Rollbacks would not affect. However, EDF analysis of Texas Standard Permits found that only roughly 5.5% of well sites in Texas are required to conduct LDAR. We have continued to show which wells would be unregulated by federal standards in Texas, but have accounted for state standards in our assessment of emissions impacts. [Learn more.](#)
